

synergyAI

Never get
rugged again.

Whitepaper

2023

Introduction

The DeFi space, while promising, is riddled with risks - many of which are not present in the traditional financial system - especially **RUG PULLS**.

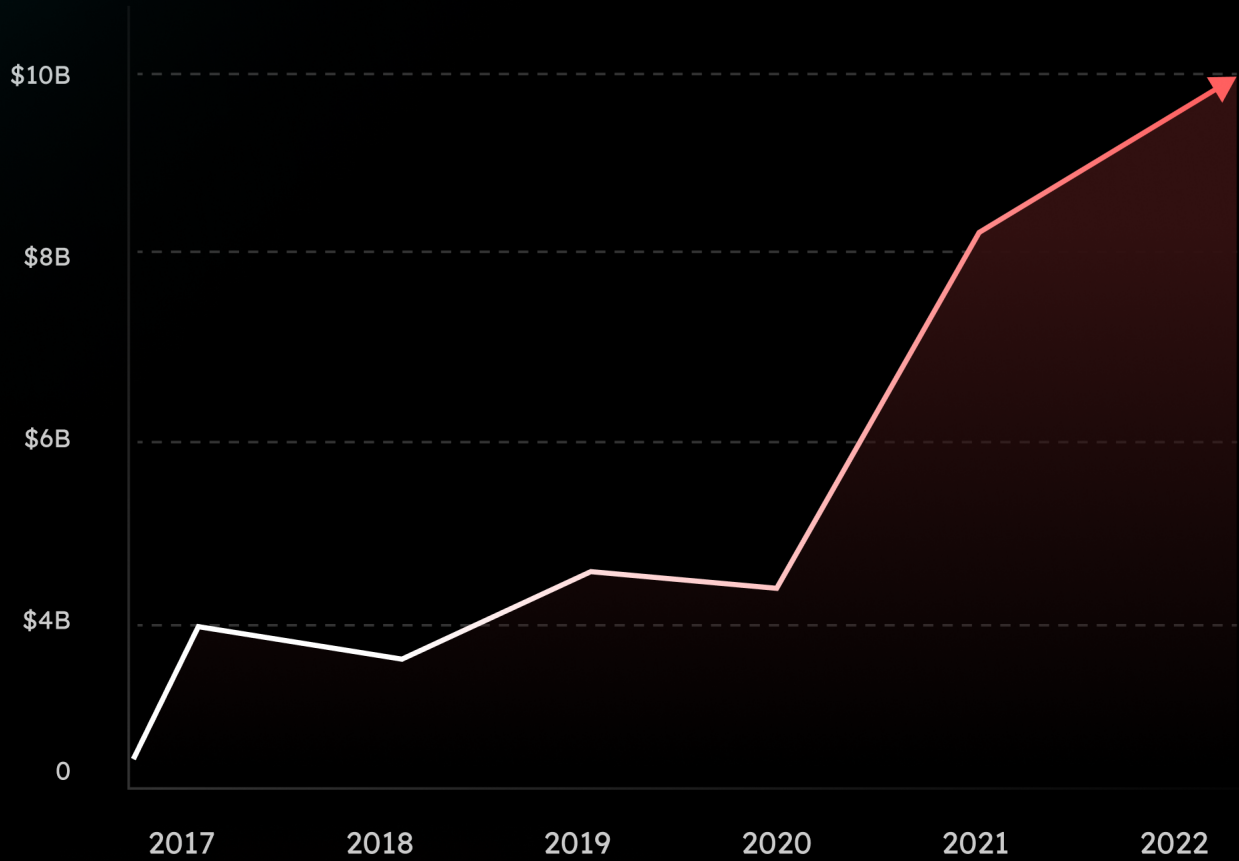

SynergyAI is a game-changing platform that's set to redefine how investors interact with the DeFi space and improve safety of their investments.

- **Gamified DeFi** exploration
- **Anti-scam** tools
- **Portfolio** Management

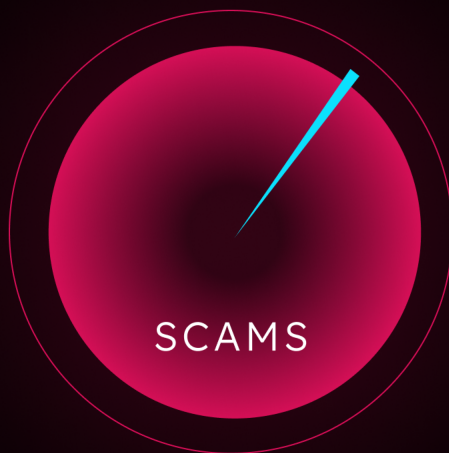

The Problem

The rug pull numbers are growing in an alarmingly increasing rate.

Unfortunately, almost every DEX trader in crypto space experienced the rug pulls, too.

97.7%

of all tokens ever listed on Uniswap were a scam

The Solution - SynergyAI

SynergyAI is a solution designed for crypto traders to mitigate risks in the DeFi market. By using the blockchain data with the help of the Artificial Intelligence, SynergyAI allows safer and informed investment decisions on the decentralized markets.

■ SAFU Score

A unique risk assessment tool that combines blockchain transaction simulation, AI code analysis, and holder distribution into a single safety score for DeFi investments.

■ Holder Analysis

A feature that visualizes the connections between wallets and the portion of the total supply they hold, offering insights into token distribution and potential concentration risks.

■ Frontrunner

An advanced mempool scanner that proactively detects and counters fraudulent transactions. This feature is serving as a protective shield against rug pulls.

■ DeFi Explorer

A tool that enables users to analyze DeFi tokens by bringing crucial information about their performance, liquidity, and other key on-chain metrics.

■ Multi Wallet Portfolio Tracker

A user-friendly portfolio management tool that allows users to track and manage their investments across multiple wallets in one unified view.

SAFU Score

SAFU SCORE is a unique feature of the SynergyAI platform that provides an easy-to-understand safety score for DeFi investments.

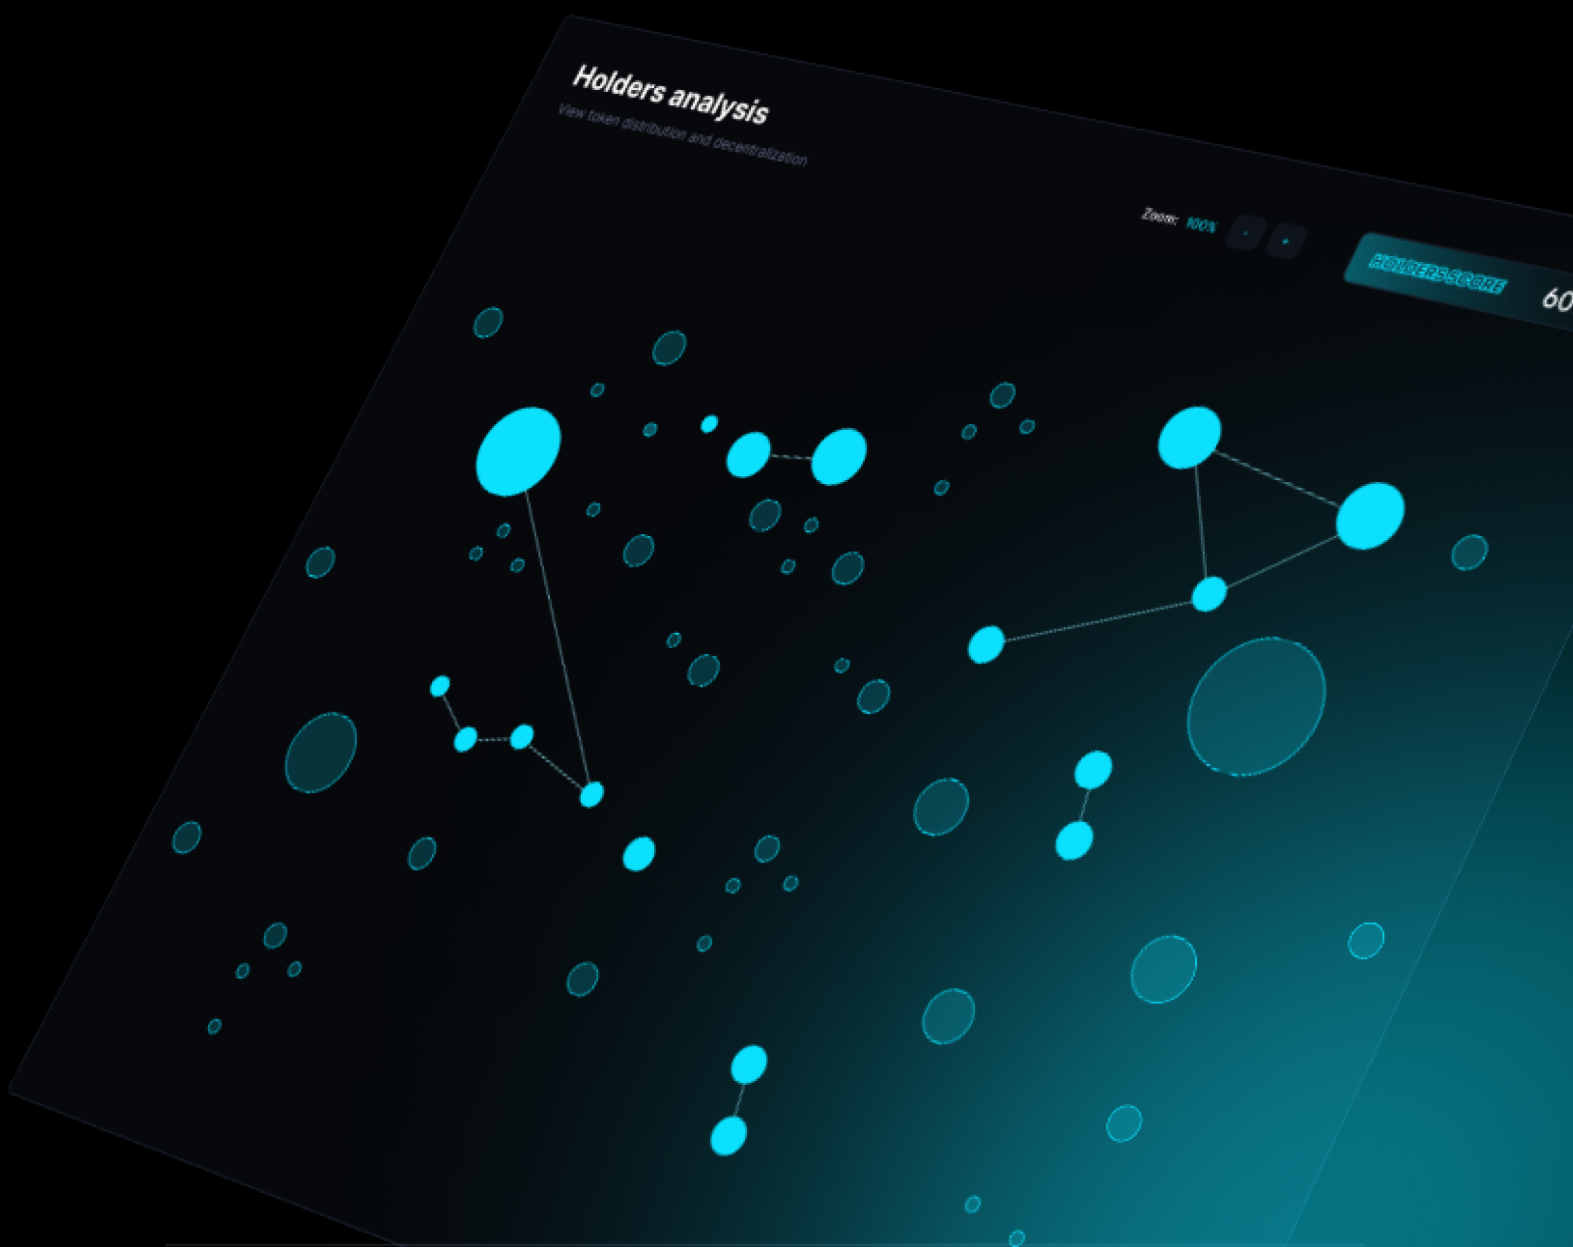

It combines on-chain data, AI and distribution analysis to create a simple to understand score for rating tokens.

Holders Analytics

Holders Analytics is a key feature of SynergyAI that provides insights into the distribution of a token and the connections between holders' wallets.

This feature helps to visualize the proportion of the total supply held by each wallet and maps the relationships between them. This way it allows users to identify potential concentration risks and understand the network of holders, providing valuable context for investment decisions.

FRONTRUNNER

FRONTRUNNER is an advanced feature of SynergyAI that serves as a proactive shield against various types of malicious transactions.

Never get rugged again. FRONTRUNNER automatically sells your tokens before the scammers manage to rug pull. Using our mempool scanner, we are able to always stay one transaction ahead of the rug pullers.

Gamification

SynergyAI integrates a dynamic gamification system to foster user engagement and create a competitive yet collaborative environment.

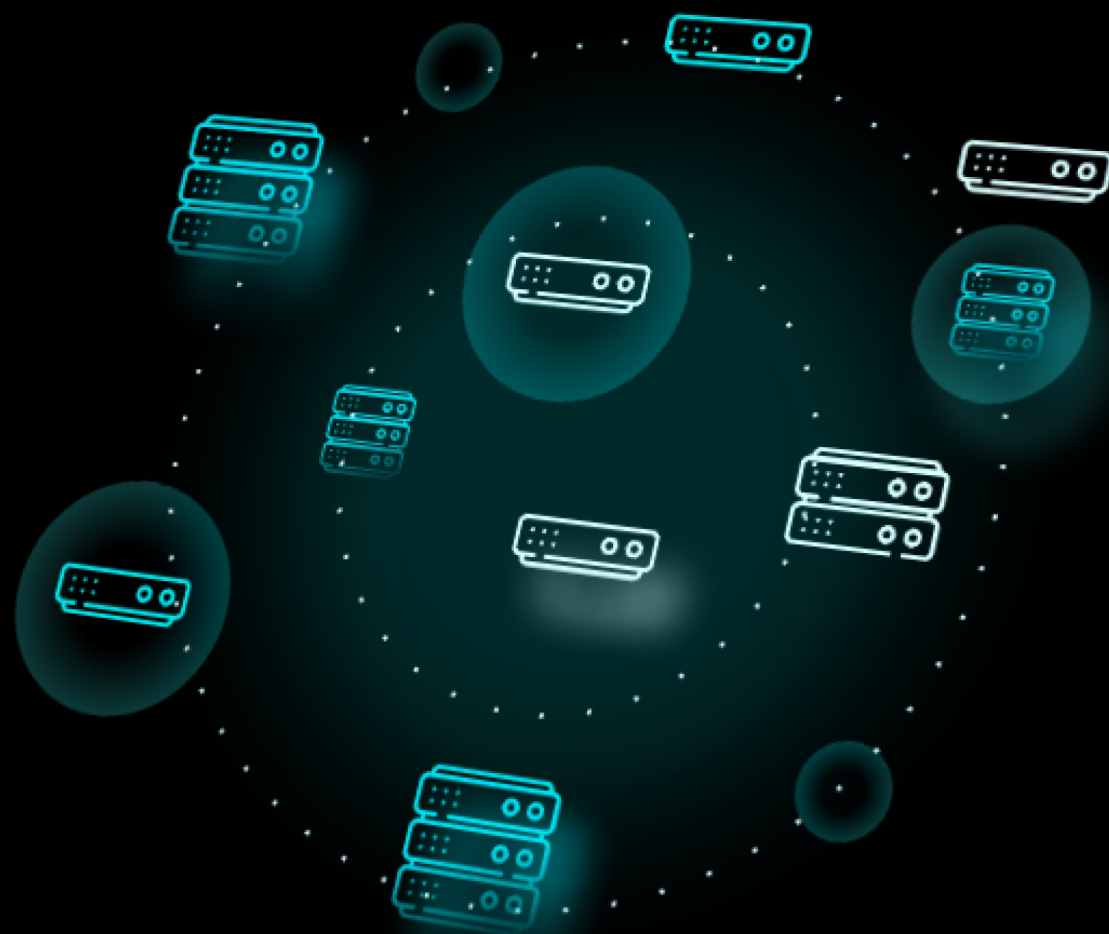

Earn rewards by levelling up and completing quests. Choose one of three teams and trade together to unlock higher staking rewards. Grow your portfolio as you reach new levels and get new achievements.

SynergyAI B2B Solutions

SynergyAI's is not only facing direct consumer applications, as our advanced AI and smart contract scanning infrastructure offers significant business-to-business (B2B) opportunities.

With almost 97.7% of Uniswap projects being rug pulls there is a growing demand for secure and reliable smart contract audits. The SynergyAI team leverages its existing infrastructure to provide smart contract audit services and automated testing for enterprise clients. This allows businesses to ensure the security and reliability of their smart contracts, mitigating risks and enhancing trust among their users.

TOKEN ALLOCATION			VESTING SCHEDULE				
Allocation	% of Total Supply	Amount of tokens	% of allocation	% of supply unlocked at TGE	Cliff (in months)	Vesting (in months)	Total vesting (in months)
Seed	10%	100,000,000	5%	0.50%	1	12	13
Private	15%	150,000,000	5%	0.75%	1	10	11
Public	4%	40,000,000	25%	1.00%	0	6	6
Team	12%	120,000,000	0%	0.00%	12	36	48
Advisors	7%	70,000,000	0%	0.00%	8	28	36
Marketing	15%	150,000,000	0%	0.00%	6	36	42
Reserve	10%	100,000,000	0%	0.00%	18	48	66
Protocol rewards	10%	100,000,000	0%	0.00%	1	48	49
Liquidity	15%	150,000,000	7.5%	1.13%	0	24	24
Airdrop	2%	20,000,000	2.5%	0.05%	2	24	26

Roadmap

DEVELOPMENT

TRACTION

2023

- Research and experimentation with on-chain data 
- Legal entity formation
- Early prototype of AI smart contract analyzer
- Website launch
- SAFU SCORE analysis tool
- Holders analysis
- Portfolio tracker
- Complete AI smart contract analysis
- Closed-access beta launch

Partnerships

- KROMA Network
- Tonstarter
- Chainlink
- HACKEN
- Cookie3

300 waitlist signups

Q1 2024

- TON integration 
- Prescanning tokens on main page 
- SAFU SCORE upgraded with new variables 
- Liquidity locks on token page
- Infrastructure refactor for running at scale
- Public launch

Ambassadors

- Tubylec
- CRYPTO SHERIFF
- DeFi Princess
- szark.eth
- Oak Investor
- LUGA

350 new waitlist signups

Q2 2024

- Telegram bot for displaying analysis and market data for tokens
- Synergy Buy Bot for Telegram - as part of go-to-market strategy
- Integration of major EVM chains, including Polygon, Arbitrum, BNB Chain

TBA

Roadmap

DEVELOPMENT

TRACTION

Q3 2024

- Refactor to use dedicated indexer for TON data
- Integration of smaller EVM chains
- Solana integration
- New gamification quest paths
- Trading competitions inside the platform
- Limit orders

TBA

Q4 2024

- Mobile app launch
- Telegram mini app launch
- New gamification quest paths
- Database migration to GraphQL
- FRONTRUNNER - mempool scanner which frontruns malicious transactions release

TBA

Partners & Backers

**HACKEN**

**Chainlink**

**Kroma**

**cookie3**

**Tonstarter**

**polygon**
